> **Demonstration environment**

Development board : Raspberry Pi 500 (8G RAM)

SD(TF)card：32G（Above 16G, the larger the capacity, the more models can be experienced）

```
Raspberry Pi 500 (8G RAM): Run 8B and below parameter models
```

LLaVA (Large scale Language and Vision Assistant) is a multimodal model aimed at achieving universal visual and language understanding by combining visual encoders and large-scale language models.

Model scale

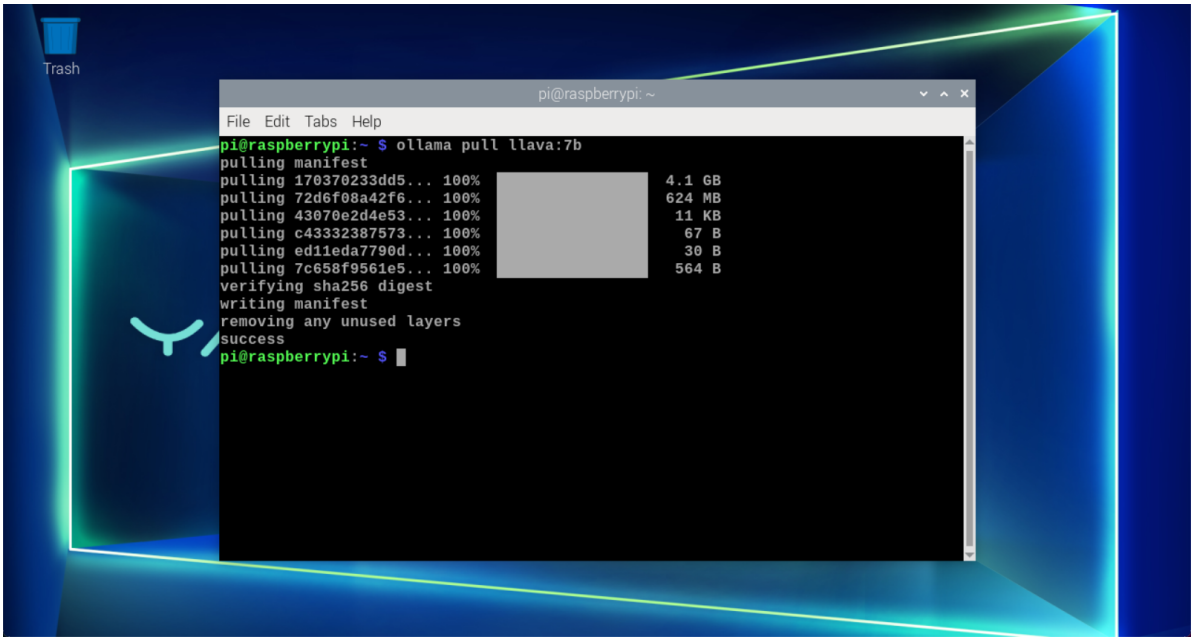
Model	Parameter
LLaVA	7B
LLaVA	13B
LLaVA	34B

```
Raspberry Pi 500 (8G RAM): LLaVA model testing with 7B parameters.
```

Got LLaVA

Using the pull command will automatically pull the models from the Ollama model library.

```
ollama pull llava:7b
```



Use LLaVA

Use LLaVA to recognize local image content.

Run LLaVA

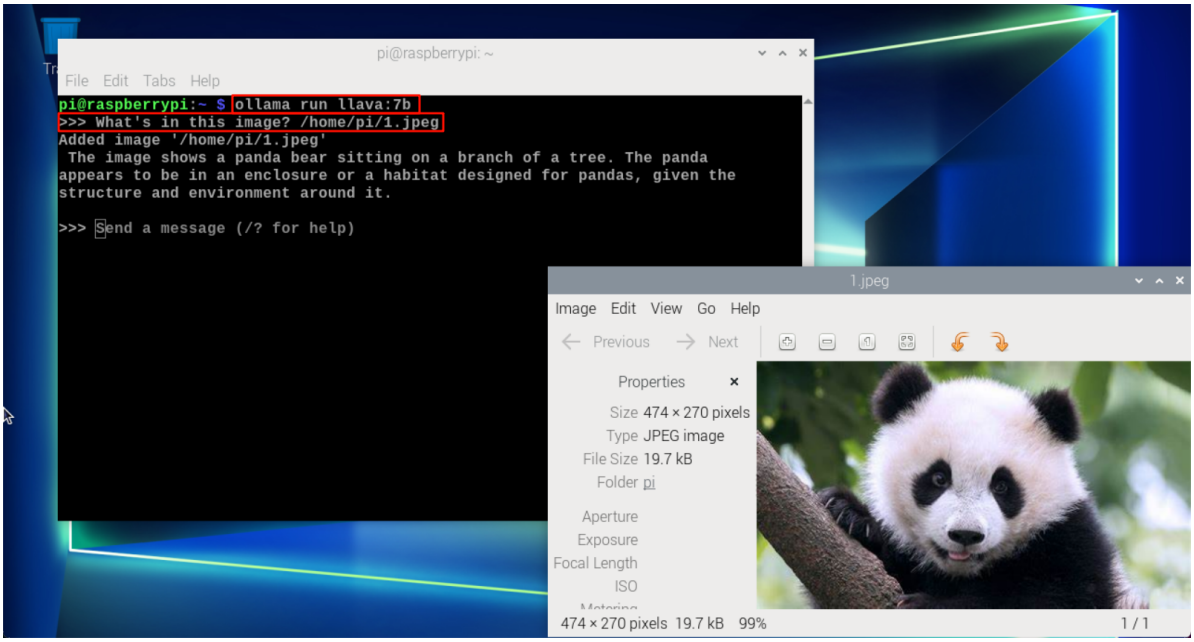
If the system does not have a running model, the system will automatically pull the LLaVA 7B model and run it: **The Pi500_AI_Pure image does not provide this model!**

```
ollama run llava:7b
```

Dialogue

```
What's in this image? /home/pi/1.jpeg
```

The time to reply to the question is related to the hardware configuration, please be patient.



End conversation

You can end the conversation by using the shortcut key 'Ctrl+d' or '/bye'.
